## Single Station Smoke Detector with 4G Communicator

The 4G Smoke Detector provides a reliable and efficient fire alarm solution without the need for additional wiring or fixed telephone lines. When smoke is detected, the device activates a local siren and sends an SMS alert via its built-in 4G communicator to preset contact persons.

With its low-power design, the 4G module operates on a lithium battery that lasts for over one year. Each detector is built for a lifespan of up to 10 years, offering long-term, cost-effective protection.

### Feature

- ★ Supports up to 3 destination phone numbers
- ★ Sends SMS and phone call alerts when smoke is detected (4G version supports SMS only)
- ★ Low battery SMS notifications
- ★ SMS-based configuration for easy setup
- ★ Scheduled SMS reports with customizable intervals
- ★ External RF module supports connection with additional RF smoke detectors

# 4G Smoke Detectors

## Application

- ▲ Standalone wireless fire alarm system – quick to deploy and easy to install
- ▲ Trusted by insurance companies for fast and effective fire detection
- ▲ Used by real estate and property management firms as a temporary alarm system during construction or renovation
- ▲ Ideal for architects and contractors seeking a flexible, wireless fire safety solution

## Model

- ▲ SS1801-3G: 2G/ 3G Fallback
- ▲ SS1801-4G: LTE Cat 1 and 2G / 3G Fallback

## 4G Alarm Hub (Audio / Silent Version) RF Smoke Detector

Our 4G Alarm system includes a central hub and multiple wireless smoke detectors. Designed for rapid response and reliable communication, the system delivers real-time alerts via the 4G network, providing maximum protection for residential, commercial, and industrial environments.

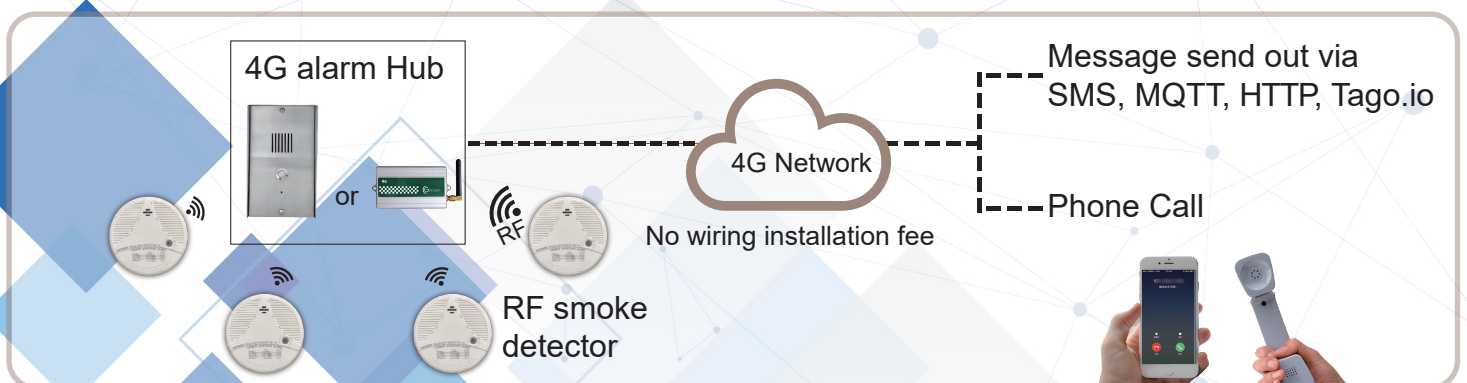

We offer two models of alarm hub: one with integrated call functionality, and one without

### Features

- ★ No Wiring Required : *Fully wireless installation – no wiring fees.*
- ★ 4G + RF Dual Connectivity : *Receives signals from RF smoke detectors and transmits alerts via 4G.*
- ★ Multi-Channel Alert Delivery :
  - Phone Calls (Supports VoLTE)
  - SMS
  - MQTT / HTTP / Tago.io
- ★ Call Functionality : *Supports up to 3 phone numbers for outgoing calls*
- ★ System Features :
  - Interlinkage between main units via SMS
  - Control and trigger all connected devices simultaneously
  - Supports up to 24 detectors
- ★ Advanced Configuration :
  - FTP support for reading/writing settings and firmware updates
  - Compatible with MQTT, HTTP, and Tago.io platforms
  - Includes 2 relay outputs for external device integration
- ★ Battery & Maintenance :
  - Low battery alerts for both main and sub-units
  - Long-life design with minimal maintenance requirements

# 4G Intercom for Communities

## SS2106 Master / Slave

### Application

The SS2106 series is designed to enable community intercom units to share one SIM card, which can significantly reduce Number of SIM cards. It is an ideal solution for large-scale installations, such as multi-building communities or multi-exit parking lots, where community intercom units can be set up at different entrances or exits, all using the same SIM card.
